

gnuplotio::FileHandleWrapper

boost::iostreams::stream< boost::iostreams::file_descriptor_sink >

gnuplotio::Gnuplot

```
classDiagram
    gnuplotio::Gnuplot --|> gnuplotio::FileHandleWrapper
```

The diagram illustrates a class hierarchy. At the top, there are two boxes: 'gnuplotio::FileHandleWrapper' on the left and 'boost::iostreams::stream< boost::iostreams::file_descriptor_sink >' on the right. A horizontal line with a vertical segment in the middle connects the bottom of these two boxes. From the bottom of this vertical segment, a line descends to a box labeled 'gnuplotio::Gnuplot'. This line then turns horizontal and ends with an arrowhead pointing towards the 'gnuplotio::FileHandleWrapper' box, indicating that 'gnuplotio::Gnuplot' inherits from 'gnuplotio::FileHandleWrapper'.
